Memo to File
Splish-Splash Car Wash
419 N West Bypass

On this date Mr. Scott Alexander called about a problem he has had with his car wash at Chestnut Exp. and 13 Bypass. Someone unknown to him has been dumping chicken bones, chicken fat, etc. into his trench drain. This has caused a odor problem as well as the extra expense of calling in a septic tank truck to suck out his pits. I explained we could keep the site under watch, but not after regular hours, to help catch the culprit. After discussion with Randy, it does not appear this is a violation of the sewer use ordinance.

Mr. Alexander can be reached at KO Manufacturing, 866-8000.
